

Apex-ICE™

Universal Serial Bus Emulator for Analog Devices DSPs!

The Apex-ICE™ is the industry's first Universal Serial Bus (USB)-based DSP emulator as well as the first portable solution designed to support ADI DSPs. The Apex-ICE emulator provides a simple, efficient method to connect the DSP emulator to today's desktop or laptop PCs via a USB port.

Debugger options for the Apex-ICE include ADI's new VisualDSP® or Allant's ASPEX™ environment running under both Windows 98 and Windows NT.

FEATURES

- Small hand-held-style unit
- Small diameter cable 5 meters in length for hard to reach targets
- Supports ADI's ADSP-2106x, ADSP-2116x and future ADI DSPs
- Designed for CE compliance

SYSTEM REQUIREMENTS

- Pentium 166 MHz or greater
- Windows 98 and Windows NT 2000
- Minimum of 32 megabytes of PC-AT memory
- One high speed USB port

ORDERING INFORMATION

Please call for pricing and ordering information. White Mountain DSP is an Analog Devices DSP Solutions Company.
