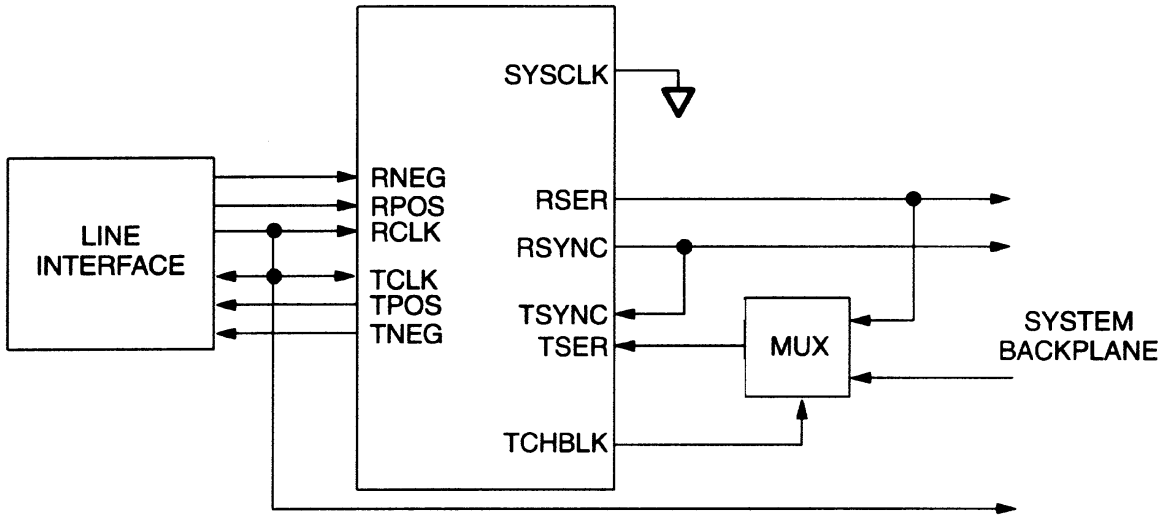
Application Note 314
DS2141A, DS2142, DS2151, DS2153 PCM Interface Per-Channel Loopback

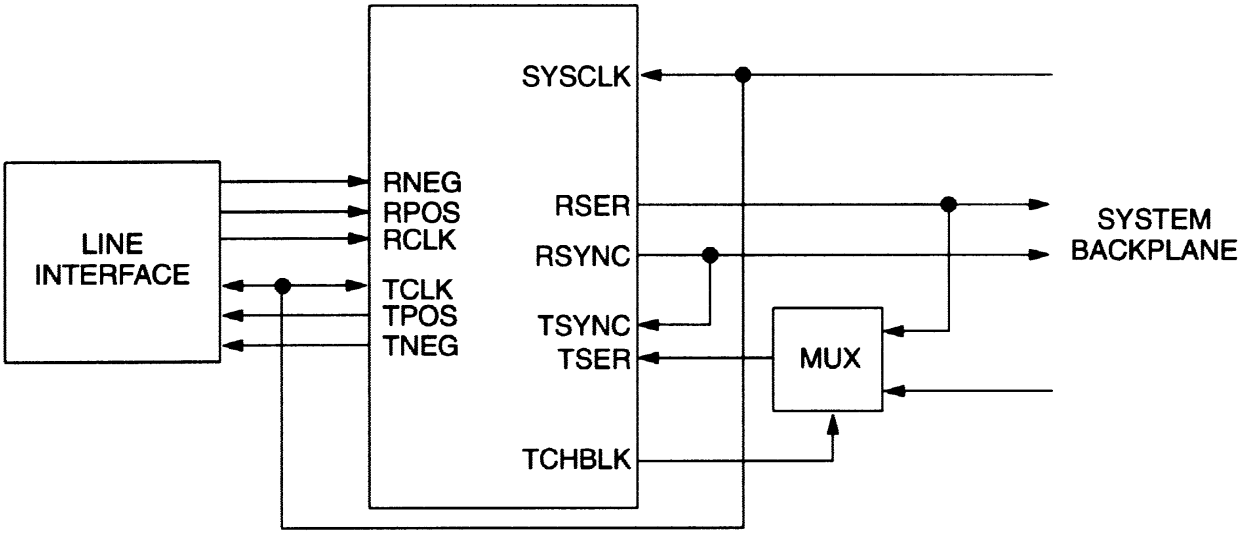
WITH ELASTIC STORE DISABLED

DS2141A/DS2143/DS2151/DS2153



WITH ELASTIC STORE DISABLED

DS2141A/DS2143/DS2151/DS2153



NOTES:

1. The TCHBLK signal is used to control a 2:1 multiplexer which will select which channels (if any) are to be lopped back to the network.
2. In DS2151 and DS2153 applications, the line interface is included onboard the devices.
